

Deer Out Information

Q. What makes Deer Out work?

A. **Deer out** is a dual deterrent **repellent** working both by smell and taste. Deer find the strong peppermint scent of **Deer Out** to be too strong of a sensation for their sensitive noses. A deer's sense of smell is 1000 greater than humans; the strong peppermint scent of **Deer Out** creates a cool menthol burning sensation that deer are repulsed by. (Minty fresh scent to us humans, sort of like a peppermint patty) But even long after we can't smell it anymore it is still too strong for the deer's nose. No need to worry though, it won't harm the deer at all, but it will stop them from eating your plantings. All the other ingredients found in **Deer Out** combined together create a very strong flavor & smell that deer find unappetizing. A Deer is a wild animal; they may take a bite but they're not going to wipe out your flowerbeds anymore.

Q. How long is Deer Out effective?

A. Under normal weather conditions **Deer Out** can last up to 3 or 4 months or more.

Q. Will Deer Out wash off in the rain?

A. No, here's why. We added two **all Natural** stickers to **Deer Out**. Gum Arabic, which is found in many traditional chewing gums, and hydrogenated vegetable oil, which everyone knows that oil & water, don't mix. The combination of the two work exceptionally well together at keeping the rest of the ingredients found in **Deer Out** sticking to your plants without the addition of any harmful chemicals or commercial glues. Use common sense, during periods of abnormally heavy rain, or during the rapid growing stages of your plantings, touch-up & reapply **Deer Out** to your plants that need protection. **Deer Out** will not easily wash off in the rain and can continue to be effective, but the potency can be affected by severe conditions.

Q. Can it be applied on fruits & vegetables?

A. Yes, **Deer Out** is **100% natural** exempt from EPA registration and is considered safe under category 25B "food based product" however we do recommend that you wash all fruits & vegetables thoroughly prior to eating to remove any remaining solution that may affect the taste.

Q. Will Deer Out harm my plants?

A. **Deer Out** will not burn, leave a film, stain or discolor.

Q. Where can I buy Deer out?

A. Click **here** for a list of Nurseries, Garden centers & hardware stores in your area that carry **Deer Out**. And don't forget that you can always place an order here on line.

Q. Is Deer out expensive like all the other deer repellents?

A. No, **Deer Out** is Very cost effective, and cheaper than most other products. Take for instance our ready to use spray bottle, it comes in a 40 oz bottle that covers 1250 square ft for \$15.99 that's 25% more than the 32oz size that cover 500 sq. ft offered by other companies, and they typically sell for up to \$24.99 a bottle. And best of all, **Deer Out** really works, not like most other **repellents** that only work 50% of the time at best. When you purchase our larger sizes the savings are even more tremendous, take a look at our entire product line and compare our prices

Q. Is there a guarantee with Deer Out?

A. Absolutely, 100% money back guarantee (see individual bottle's for details) excluding shipping cost

Q. Is it too late to save my shrubs?

A. Probably not, but It all depends on how far gone they are, **Deer Out's all natural Organic composition** will stimulate re-growth on previously damaged plants, so don't wait any longer, apply **Deer Out** today! Summer, spring, winter & fall it works great!
